

Delivering solutions

theswaingroup.com

Swain Group is one of the most renowned logistics service providers within the UK and can boast unique specialisms and services which reflect distribution challenges of the construction and manufacturing sectors. We are made up of seven divisions which offer solutions for every type of load or commodity.

Since 1918, the Swain Group has provided customers with highly effective logistics solutions – from general haulage to specialist lifting, heavy haulage, and bulk movements.

Our reputation has been forged over 100 years through providing exceptional customer service. Investment has been the key to Swain Group's success, as we are always willing to improve our fleet capability with equipment purchases and strategic acquisitions. The Swain team have significant experience in the delivery of the most challenging of projects.

We work across a variety of sectors, including construction, energy, industrial, retail, ecommerce, government, and defence. Our proven expertise and industry experience has led to us being selected for some of the most challenging infrastructure tasks in recent years, including Crossrail, Tideway, HS2, Heathrow Terminal 5 and many other prestigious projects which demand the very best in logistical services.
